

On 12<sup>th</sup> June, our customer from Ecuador visit our factory. They are famous auto parts manufacturer and supplier for FORD, GM etc.

From 9:00 on 12th, it starts the visit. Firstly come to our samples room, which include various auto metal parts we have made, seat, bumper, panel, door metal parts, auto gasket, by progressive die, transfer die or mult stage stamping die etc. Then it comes to our engineer department, which use software PRO/E, UG, AUTOCAD, etc. Following is the workshop, full of equipments, CNC, EDM, WEDM-LS, Gun drill, milling center, grinding center, assembling area, tryout press machine and so on. Our works and scales leave a deep impression to him.

Technology communication.

Between the meeting time, we talk with each other about every part and every detail. through that we learn each other better, and strengthen the relationship in the futural cooperation.
