On 7th Nov. 2013, the 13 sets of cylinder head gaskets stamping dies for our Peru customer, has left our factory and finished the shipment in Qingdao port.

The gaskets dies have been manufactured for about 40 days after the die structure is confirmed. As we have much experience on cylinder head gaskets dies, there are few problems in the fabrication and die trial time.

For this order, most of the parts are 4 cylinders, and the others are 6 cylinders. All of the dies are stage stamping dies.

So far, the gasket dies have been arrived to our customers, and works well there.
